saadkulumba@outlook.com | 510-399-9234 | <https://www.linkedin.com/in/skulumba>

SUMMARY

Information Security professional with experience in log analysis, and system troubleshooting across enterprise environments. Skilled in analyzing security events, and improving visibility into system and network activity. Strong ability to document findings, support cross-functional teams, and maintain organized security workflows

TECHNICAL SKILLS

Log Analysis, Vulnerability Assessment, Security Monitoring, TCP/IP, DNS, Splunk, Wireshark, Nmap, Python, SQL, Bash, AWS, Linux, Windows, AI

EXPERIENCE

Amazon — Sort Center Ambassador, Newark, CA | 05/2023 – Present

- Improved operational efficiency for a team of 20+ employees by providing hands-on guidance, troubleshooting workflow issues, and coordinating with supervisors to resolve problems quickly.
- Reduced operational errors and onboarding time by supporting new employees during training sessions and ensuring compliance with operational and safety standards.
- Enhanced communication between management and staff across multiple shifts by acting as a liaison, identifying workflow issues, and escalating technical or operational problems.

Test Birds — Usability & UX Tester, Remote | 05/2017 – Present

- Improved web application reliability and usability across multiple client platforms by identifying software bugs and where necessary.
- Strengthened authentication and access control in financial applications by analyzing login workflows, testing system configurations, and reporting security and usability vulnerabilities.

Correlation One — Cybersecurity Analyst Training Program, Remote, CA | 02/2025 – 07/2025

- Analyzed system logs and network traffic using Splunk, Wireshark, and Nmap to identify suspicious activity and security gaps
- Investigated anomalies such as brute-force attempts and lateral movement in simulated enterprise environments
- Documented findings and recommended mitigation strategies aligned with security frameworks (e.g., MITRE ATT&CK)
- Automated log analysis using Python and SQL to improve efficiency and visibility into security events

Karan Yazılım — Information Technology Support, Izmir, Turkey | 06/2018 – 09/2019

- Deployed and configured multiple Linux systems for internal users by performing operating system installation, system configuration, and patch management.
- Maintained network infrastructure performance across office environments by assisting with configuration and troubleshooting of routers, switches, and firewall devices.

EDUCATION

MS Computer Science, University of Illinois Urbana-Champaign, IL, USA | 2025

B.Sc. Computer Engineering, Gediz University, Izmir, Turkey
